PROFILE SUMMARY

Dedicated Information Systems student with hands-on experience in DevOps, AI engineering, data management, and software development. Proven ability to design and maintain scalable cloud infrastructure, implement CI/CD pipelines, and integrate AI-powered solutions. Committed to leveraging technical expertise to drive innovation and support efficient, data-driven operations.

WORK EXPERIENCE

PT. Aneka Delapan Indonesia

Apr 2026 – Present

DevOps & AI Engineer • Kabupaten Tangerang, Indonesia

- Designed, deployed, and maintained scalable cloud-based infrastructure to support application development and business operations.
- Implemented CI/CD pipelines to automate software build, testing, and deployment processes, improving development efficiency and reducing deployment time.
- Managed containerized applications using Docker and orchestration tools to ensure high availability and system reliability.
- Monitored system performance, server health, and application logs, proactively identifying and resolving operational issues.
- Developed and integrated AI-powered solutions to automate business processes, enhance decision-making, and improve operational productivity.
- Built and optimized machine learning workflows, including data preprocessing, model deployment, and performance monitoring.
- Implemented security best practices, access controls, and infrastructure hardening to ensure system integrity and compliance.
- Leveraged AWS and Google Cloud Platform to manage infrastructure resources and AI services.
- Researched and evaluated emerging DevOps and AI technologies to continuously improve system architecture and capabilities.

PT. Paramadaksa Teknologi Nusantara (nexSOFT)

Jun 2024 – May 2025

Data Specialist • Tangerang, Indonesia

- Accurately entered, updated, and maintained large volumes of data in company databases, ensuring data integrity and minimizing errors.
- Performed data verification and validation processes to ensure accuracy and completeness of records.
- Organized and managed electronic files, consistently maintaining database efficiency for easy data retrieval.
- Collaborated with team members to meet data entry deadlines, contributing to smooth workflow and operational efficiency.
- Utilized software tools effectively to enhance data entry speed and accuracy, supporting various project and reporting tasks.

Kalananti by Ruangguru

Nov 2022 – Oct 2023

Text-Coding Teacher • Tangerang, Indonesia

- Created comprehensive teaching materials aligned with curriculum goals to enhance student learning and engagement.
- Conducted interactive classes, promoting discussion and ensuring student comprehension of core programming concepts.
- Implemented regular assessments to monitor student progress, providing constructive feedback and adjusting teaching methods accordingly.
- Coordinated with colleagues on lesson plans and shared best practices to address individual student needs.
- Managed virtual learning platforms, troubleshooting technical issues to maintain a smooth online learning experience.
- Participated actively in team meetings to discuss progress, exchange insights, and strategize educational improvements.

Badan Pusat Statistik (BPS)

Sep 2022 – Nov 2022

Field Data Officer • Tangerang, Indonesia

- Conducted accurate and thorough field data documentation, ensuring reliability and completeness of collected data.
- Identified and selected suitable respondents according to study criteria to ensure data relevance and accuracy.
- Collaborated with team members to align on objectives, share insights, and maintain efficient workflows throughout data collection.

EDUCATION

Universitas Pelita Harapan

Aug 2024 – Present

Bachelor of Information Systems — Employee Class • Tangerang, Indonesia

- Relevant Coursework: Database Management, System Analysis & Design, Information Security, Data Analytics, Software Engineering, Business Process Modeling, Project Management, Cloud Computing, and ERP Systems.
- Projects: Developed a fully functional web application with a responsive, interactive UI; built a cross-platform mobile application ensuring compatibility and smooth user experience across devices.

PROJECTS & PORTFOLIO

GitHub Portfolio

github.com/runnrobbot

A collection of application, website, and data analytics projects using Python, JavaScript, React, and more — each documented with code explanations and feature highlights.

Personal Portfolio Website

muhammad-firman-nafis.vercel.app

Personal portfolio showcasing profile, skills, and selected project work. Built with a modern, responsive design for an optimal viewing experience.

SKILLS

Soft Skills: Leadership, Communication, Problem Solving, Adaptability, Analytical Thinking, Teamwork, Attention to Detail

Programming Languages: Python, Java, JavaScript, C#, C++, React, Lua, Dart

Web Development: HTML, PHP, Bootstrap, JavaScript, React, REST API Development

Database Management: MySQL, Firebase, MongoDB, Supabase

DevOps & Infrastructure: Docker, Linux Administration, CI/CD, Nginx, GitHub Actions, Shell Scripting

AI & Machine Learning: LangChain, PyTorch, Data Preprocessing, Model Training & Deployment

Cloud Platforms: AWS, Google Cloud Platform

Network & Security: Network Administration, Cybersecurity Fundamentals, Firewall Configuration, SSL/TLS

Data Analysis: Microsoft Excel, Tableau, Google Colab

Version Control: Git, GitHub, GitLab

Project Management: Trello, Jira

Software & Tools: Visual Studio Code, Android Studio, Postman, Notepad++
